DEPARTMENT OF STATE

WASHINGTON

February 6, 1953

To: Assistant Director, OCD  
25X1A9a Central Intelligence Agency

Attention: [REDACTED]

Subject: CIA Geographic Intelligence Report, entitled  
"The Boundary between Norway and the USSR," dated  
October 31, 1952 CIA/RR-G-4.

The Department has reviewed the subject report and finds it a useful and thorough study of an area concerning which little information is currently available.

A recent despatch from Legation Helsinki (No. 365, dated December 12, 1952) provides detailed information concerning the Rajakoski power plant, which is now being constructed on the Pasvikelv River for the USSR by the Finnish State Power Company, Imatran Voima Oy.

However, on page 32 of the subject report the capacity of the Rajakoski plant is given as 25,000 kw, while Helsinki's despatch states that the plant's capacity is now estimated at 50,000 kw.

This information is being brought to your attention so that your records may be current.

25X1A9a  
[REDACTED]

Acting Chief, CIA Liaison Branch  
Acquisition and Distribution Division

CLB-2871

Rec'd 10 February 1953. BAS. CI Branch, LD, C&D.
